```sql
/* Use this script to get the logical and physical
   file names for the database data and log files. */

select db.name, fi.name as 'Logical filename',
       fi.filename as 'Physical Filename'
from sys.sysdatabases db
inner join sys.sysaltfiles fi
on db.dbid = fi.dbid
-- Data files have fileid 1.
-- Log files have fileid 2.
where fileid = 1
```
